Re: Gummy Shrek

Dear: Referral Doctor's Office

Thank you for your referral and the opportunity to treat Gummy. He was seen for the following:

Initial Observations & Diagnosis:

- 6mm of recession on the facial aspect of #24, extending beyond mucogingival junction
- Lack of attached gingiva in area
- Diagnosis of Miller Class III gingival recession

Treatment Completed:

Connective tissue graft harvested from palate  
Graft secured over receded area on #24  
Coronally advanced flap reflected and sutured in place over graft  
Local anesthetic for patient comfort

Additional Comments:

No complications reported. We'll follow-up with another report after our post op evaluation in 2 weeks.

If we have any radiographs or intra-oral photos, we'll attach them to the email.

Thank you for your trust in our office.

Sincerely,

Betsy Mosquera, DDS, MSD
